## ■ Dimensions

(unit: mm)

※Use My socket which is commercially available.

## ■ Proper Usage

- For DC power supply type, be sure to check the polarity of terminals.
- 24VDC power supply should be insulated and limited voltage/current or Class 2, SELV power supply device.
- Please supply power quickly at once with using switch or relay contact. Otherwise it may cause time error or power reset failure.
- When supplying the power to the timer, connection shown in (Figure 1) might cause malfunction due to leakage current through R and C. Please connect R and C as shown in (Figure 2) to prevent malfunction.
- Do not use this unit at below places.
  - Place where temperature or humidity is out of the rated specifications.
  - Place where there is condensation by temperature changes.
  - Place where there is flammable gas or corrosive gas.
  - Place where there is dust, oil or severe vibration or impact.
  - Place where strong alkalis or acids is used.
