Autonics

8-PIN PLUG TYPE COUNTER FS SERIES

INSTRUCTION MANUAL

Thank you for choosing our Autonics product. Please read the following safety considerations before use.

Safety Considerations

% Please observe all safety considerations for safe and proper product operation to avoid hazards. Safety considerations are categorized as follows.

∆Warning Failure to follow these instructions may result in serious injury or death ▲Caution Failure to follow these instructions may result in personal injury or product damage.

*The symbols used on the product and instruction manual represent the following ↑ symbol represents caution due to special circumstances in which hazards may occur.

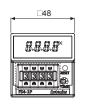

⚠ Warning

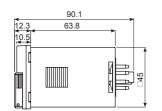

- 1. Fail-safe device must be installed when using the unit with machinery that may cause serious injury or substantial economic loss. (e.g. nuclear power control, medical equipment, ships, vehicles, railways, aircraft, combustion apparatus, safety equipment, crime/disaster prevention devices, etc.)
- Failure to follow this instruction may result in fire, personal injury, or economic loss.
- 2. Install on a device panel to use.
- Failure to follow this instruction may result in electric shock or fire.
- 3. Do not connect, repair, or inspect the unit while connected to a power source. Failure to follow this instruction may result in electric shock or fire.
- 4. Check 'Connections' before wiring.
- Failure to follow this instruction may result in fire
- 5. Do not disassemble or modify the unit.
- Failure to follow this instruction may result in electric shock or fire

⚠ Caution

- 1. When connecting the power/sensor input and relay output, use AWG 20(0.50mm²) cable or over, and tighten the terminal screw with a tightening torque of 0.74 to 0.90N m. Failure to follow this instruction may result in fire or malfunction due to contact failure.
- 2. Use the unit within the rated specifications.
- Failure to follow this instruction may result in fire or product damage
- 3. Use dry cloth to clean the unit, and do not use water or organic solvent. Failure to follow this instruction may result in electric shock or fire.
- 4. Do not use the unit in the place where flammable/explosive/corrosive gas, humidity, direct sunlight, radiant heat, vibration, impact, or salinity may be present. Failure to follow this instruction may result in fire or explosion
- 5. Keep metal chip, dust, and wire residue from flowing into the unit. Failure to follow this instruction may result in fire or product damage.

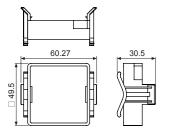

Dimensions

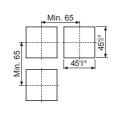

Bracket

Panel cut-out

- XThe above specifications are subject to change and some models may be
- discontinued without notice.

 **Be sure to follow cautions written in the instruction manual and the technical descriptions (catalog, homepage).

Model

Model	Display digit	Size	Output	Power supply
S4-1P2	0000 (4 dinit)	DIN W48×H48mm	1-stage setting	24VAC 50/60Hz, 24-48VDC

ı	X How to change settings			

Power OFF \rightarrow change settings \rightarrow power ON \rightarrow press RESET key or input signal (min. 20ms)

Output Operation Mode

Dot for Decimal Point

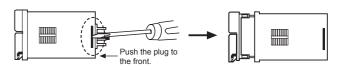

In run mode, hold the ■ RESET key for over 3 sec. and it enters setting mode [dP]. XIn setting mode, hold the RESET key for

over 3 sec, and it saves the setting and returns to RUN mode \frak{MIf} there is no \frak{RESET} key input for 60 sec

when entering setting mode, it returns to

Detaching Case

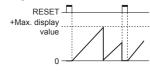

XTurn OFF the power before detaching the case.

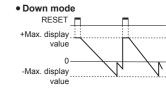

Push the grooves at both side of the unit with a flat head driver to the outside and push the plug part to the front. The plug is detached.

⚠ Be sure not to be wounded when using a tool.

Counting Operation for Indicator (FS5-I4)

X- display is only for F, K, Q, S output operation mode and it cannot be set.

Error Display and Output Operation

Error Display	Error description	Troubleshooting
ErrO	Setting value is 0.	Change the setting value anything but 0.

When error occurs, the output turns OFF.

※Indicator model does not have error display function.

Cautions during Use

- . Follow instructions in 'Cautions during Use'. Otherwise, It may cause unexpected accidents.
- 2. 24-48VDC, 24VAC power supply should be insulated and limited voltage/current or Class 2, SELV power supply device.
- 3. Use the product, 0.1 sec after supplying power.
- 4. When supplying or turning off the power, use a switch or etc. to avoid chattering.
- 5. Install a power switch or circuit breaker in the easily accessible place for supplying or disconnecting the power. 6. In case of contact input, set count speed to low speed mode (1cps or 30 cps) to operate.
- If set to high speed mode (2kcps or 5kcps), counting error occurs due to chattering.
- Keep away from high voltage lines or power lines to prevent inductive noise. In case installing power line and input signal line closely, use line filter or varistor at power
- line and shielded wire at input signal line. Do not use near the equipment which generates strong magnetic force or high frequency
- . This product may be used in the following environments. (1) Indoors (in the environment condition rated in 'Specifications')
- ②Altitude max. 2.000m

Timers

- ③Pollution degree 2
- 4 Installation category II
